

Service Before Self.

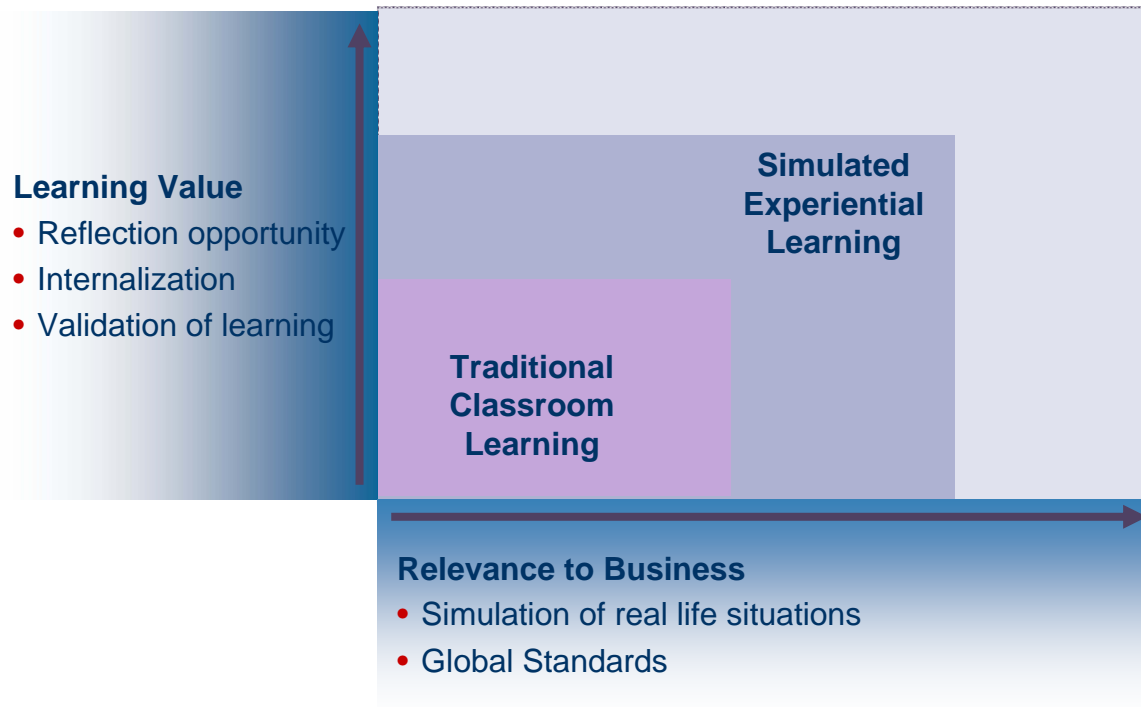

PMSoft

PMSoft Consultancy Pvt. Ltd.

Why Project Management ?

Project Life cycle is sequential in nature but project management is situational in nature. Project management helps to understand, manage , execute and close the projects and brings About situational management aspect with understanding of temporary and unique nature of the project

Helps to:

- ❖ Challenge mindsets
- ❖ Leadership Style

- ❖ Managing project
- ❖ Say “no”

- ❖ Closing Projects
- ❖ Introspect and Audit Project

Effective model offering maximum learning value

Value for Money:
Program Execution + Facilitation + Engagement

Project Mentoring / Coaching and Recovery

This support can include supporting the Initiation activities; reviewing project plans; recommend solutions and approaches for issues and risks; assisting project estimate development; developing realistic schedules; developing practical Work Breakdown Structures and templates creation; and building Project Team Relationships.

Project Retrospective Reviews (Post-Project Audits)

Our audit will identify these factors in order to capitalize on the project team experiences more effectively

Project Management Needs Assessment

We assist in the evaluation of your business needs for internal Project management. We review project methods, procedures and current project plans and also review your company's past record in Project Management.

Program Management

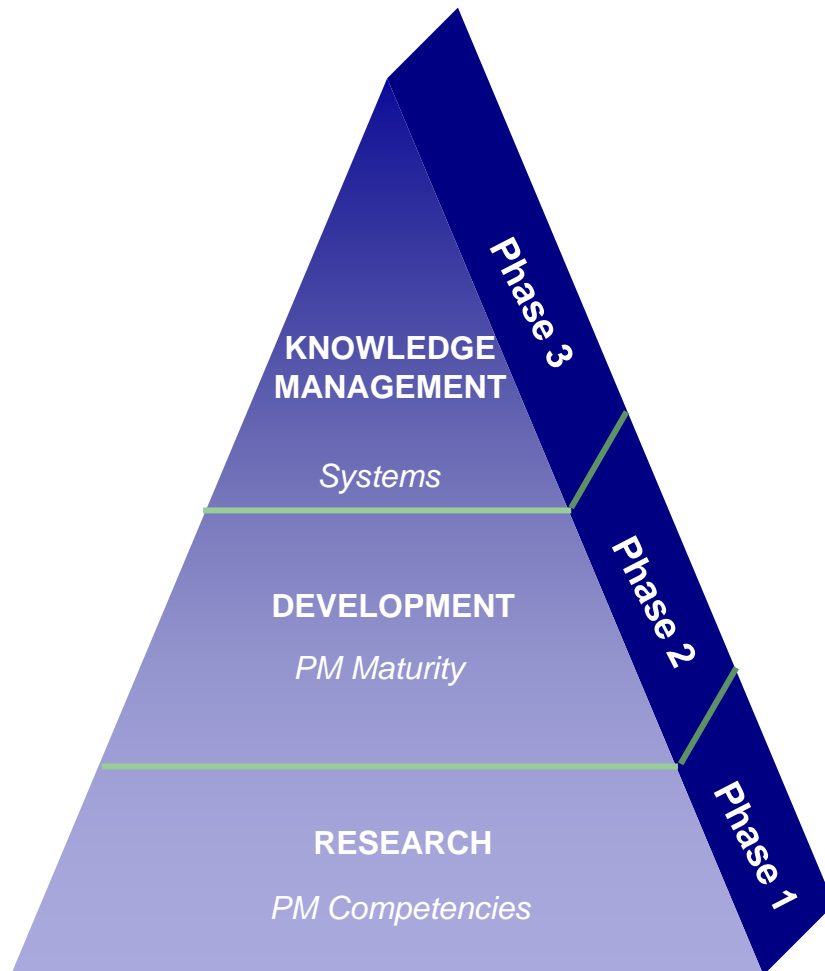

Establish and Implement Enterprise Project Management

Competency development for Program & Project Managers

Project & Program Management Methods Development

Methods development and implementation success is characterized by a plan for bringing an organization from the "Current" state to the "Future" state in a series of achievable, practical steps. The development and implementation of any methodology is a project which must be managed as a project with the requisite Sponsor, Client and Project Team commitments. Our experience can facilitate this process to take your organization in your next business orbits
