

Program Management - 2 Days

PMSoft is conducting this training program, which is designed to expose the participants to an integrated approach to Program Management. It is designed to develop the basic knowledge needed to manage Programs effectively.

All organizations have a mission, vision, strategy and a set of goals or objectives. Significant amounts of time and money are spent on programme and projects that help to achieve them.

Programme Management is a structured framework for defining and implementing change within an organization. The framework covers organization, processes, outputs and ways of thinking that focus on delivering new capabilities and realizing benefits from these capabilities. The new capabilities may be services, service improvements, working practices or products that are developed and delivered by projects

If you were to calculate the return on investment for each programme or project, you would undoubtedly see an unacceptable rate of return.

Learning Objectives:

- ❖ Increase the effectiveness of an organization's approach to program management
- ❖ Initiate and organize a large-scale program
- ❖ Manage stakeholder relationships effectively
- ❖ Manage multiple, related projects
- ❖ Establish standards and procedures to ensure consistent alignment with organizational strategy Control and execute a successful program
